Citrix ADC 12.x Traffic Management

Certification: None | **Course Length:** 2 Days | **Instructional Method:** Classroom or Virtual w/ hands-on labs

Course overview

Learn the skills required to configure and manage Citrix ADC Traffic Management features, including Content Switching, Traffic Optimization, and Global Server Load Balancing. At the end of the course, students will be able to configure their ADC environments to address efficient traffic switching and resilience requirements including Content Switching, Traffic Optimization, and Disaster Recovery.

Versions covered

This course is currently on Citrix ADC version 12.x

What you'll learn

- Optimize the Citrix ADC system for traffic handling and management

- Customize the ADC system for traffic flow and content-specific requirements

- Employ recommended tools and techniques to troubleshoot common Citrix ADC network and connectivity issues

- Configure advanced load balancing and GSLB on the Citrix ADC system

Prereq. knowledge

CNS-222 Citrix ADC Essentials and Citrix Gateway 12.x (previously known as Citrix Netscaler Essentials and Unified Gateway).

Is this course for me?

Built for IT Professionals working with Citrix ADC, with little or no previous ADC experience. Potential students include administrators, engineers, and architects interested in learning how to deploy or manage Citrix ADC traffic management

Citrix ADC 12.x Traffic Management

Module 1: Classic Policies

Module 2: Default Policies

Module 3: Rewrite, Responder, and URL Transformation

Module 4: Content Switching

Module 5: Optimization

Module 6: Global Server Load Balancing

Module 7: Clustering (optional)
